Take out garbage to the designated collection station by 8:00 a.m. on the collection day.

(By 7:30 a.m. in some areas) *Collection times vary depending on traffic conditions and other factors.

How should I take out garbage? /

Please use the garbage sorting app!

Issued by: The Resource Recycling Promotion Office, Environmental Business Division, Environment Department, Okayama City Environmental Bureau

From March 2024

How to take out plastic resources

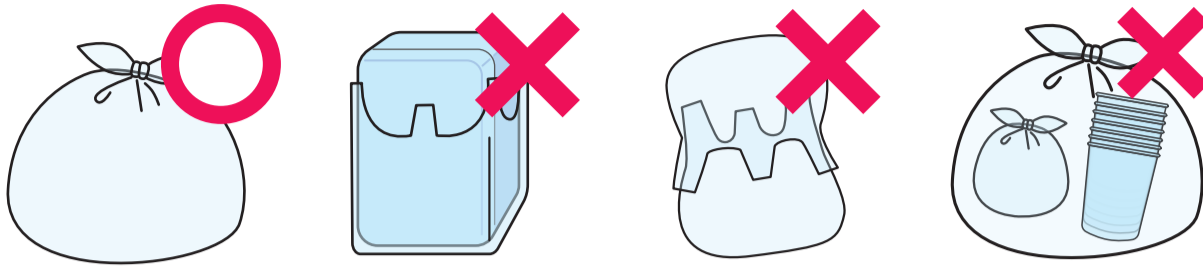

By 8:00 a.m. to the designated place on the designated day

*By 7:30 a.m. in some areas

Size guidelines

Transparent or semi-transparent bags of sizes up to 45 liters can be used

Do not put other bagged garbage inside and do not stack cups in a garbage bag.

Approximate size of bulky garbage

Garbage (one item) that does not fit into

the 20-liter fee-based designated bag

<Request> Thin and long items can cause machine breakdowns at the processing facility. If one side of an item is 50 cm or longer when unfolded, cut it into pieces shorter than 50 cm, even if that item fits into a 20-liter designated garbage bag when folded. Examples: Plastic sheets, hoses, etc.

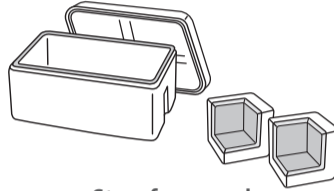

Items that can be collected as "plastic resources" (Examples)

Containers, cups, and trays that contained food

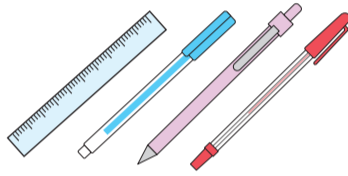

Candy bags, food packages, etc.

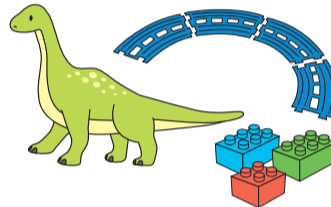

Styrofoam and cushioning materials

Shampoo and detergent bottles, etc.

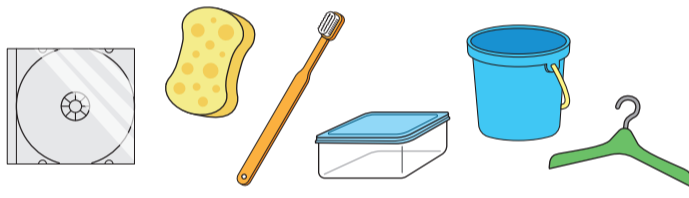

Plastic stationery

Plastic toys

Caps and labels of PET bottles

CDs, DVDs, sponges, toothbrushes, plastic containers and buckets, hangers (metal hooks are acceptable), etc.

Items that cannot be collected as "plastic resources" (Examples)

Containers, etc., that cannot be cleaned with water (classified as burnable garbage)

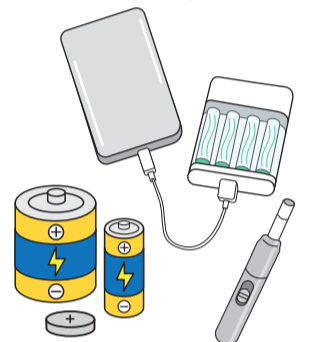

Items used for in-home medical care (classified as burnable garbage)

Thick materials (classified as burnable garbage)

Items that are at risk of causing a fire such as devices using dry cell batteries or rechargeable batteries, electronic cigarettes, etc. (classified as recyclables)

Items with blades (classified as non-burnable garbage)

Small household appliances

PET bottles (classified as recyclables)

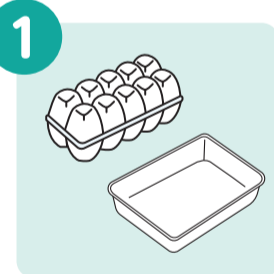

Rubber and silicon products (classified as burnable garbage)

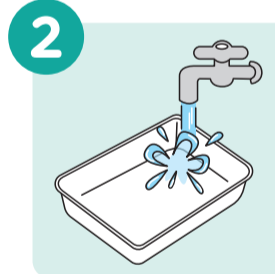

How resources are collected?

Separate plastics and dispose of items according to the following steps.

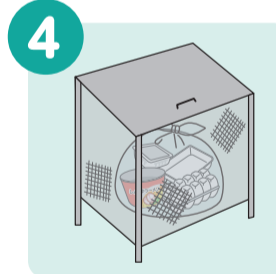

Separate plastics. Labels can be left as they are.

Wipe off or rinse off dirt with water and drain off the water.

Put items in a transparent or semi-transparent bag, not a fee-based designated garbage bag.

Take out to the same collection station as burnable and non-burnable garbage.

Request

⚠ Never put items such as batteries (devices using dry cell batteries or rechargeable batteries), lighters, razors, and items used for in-home medical care into a bag.

- Electronic devices such as mobile batteries, electronic cigarettes, and electronic device batteries containing lithium-ion batteries, etc. may cause a fire.
- Razors and other items with blades may cause injury to workers during collection and sorting.
- Items used for in-home medical care should be disposed of as burnable garbage. (Needles and other sharp objects should be returned to your healthcare provider or pharmacy.)
- Double or triple bagging of plastics makes bag-breaking and plastic-sorting work cumbersome at the processing facility. Put the plastics directly into a single bag.

Notice

Collection of "food trays (styrofoam and transparent trays)" at ward offices and community centers, etc., will be discontinued at the end of February 2024.

When is garbage collection day in my area?

You can find out from the Okayama City website under "Schedule of Garbage Collection Days Okayama."
